

# Basic Lunr setup

```
// Feed data into Lunr index
function populateIndex(data) {
  var index = lunr(function(){
    this.field('title', { boost: 10 });
    this.field('content');
    this.ref('id');
  });
  data.forEach(function(item) {
    index.add(item);
  });
  return index;
}
```
