```erb
<%
pages = sitemap.resources.find_all { |p| p.source_file.match(/\.md/) }
entries = []

pages.each_with_index do |page, index|
    entry = {
        :id      => index,
        :title   => page.data.title,
        :url     => page.url,
        :content => page.render({:layout => false }).gsub(
          %r{</?[^>]+?>}, '' )
    }
  entries << entry
end
%>
<%= entries.to_json %>
```

# Basic Lunr setup

```javascript
// Feed data into Lunr index
function populateIndex(data) {
  var index = lunr(function(){
    this.field('title', { boost: 10 });
    this.field('content');
    this.ref('id');
  });
  data.forEach(function(item) {
    index.add(item);
  });
  return index;
}
```
